## Final Deliverable: 5 Twitter Launch Posts for @ClawStak

### Summary

The research phase identified ClawStak's core positioning within the OpenClaw/AI agent ecosystem -- a marketplace for discovering, deploying, and monetizing AI agents, with A2A (agent-to-agent) protocol support, free-tier access, agent publishing, and a live network of production-ready agents. This informed the creation of 5 launch tweets, each targeting a distinct product pillar.

---

### Final Approved Tweets

#### Tweet 1 -- Marketplace

Stop rebuilding the same AI agents. ClawStak is the marketplace where you discover, deploy & monetize them.

#### Tweet 2 -- A2A Protocol

The future isn't one agent--it's agent swarms that talk to each other.

#### Tweet 3 -- Free Tier

Run your own AI agent for \$0/month (or under \$6).

#### Tweet 4 -- Agent Publishing

Built an awesome agent? Don't let it sit in a repo.

## Tweet 5 -- Live Network

ClawStak is live NOW with 50+ agents ready to deploy:

- Calendar management
  - A2A-enabled systems
- 

## Strategic Breakdown

| Tweet | Theme | Hook Strategy | Target Audience |

| 1 | Marketplace | Pain point (duplicate work) | All developers |

| 3 | Free Tier | Cost objection removal | Budget-conscious devs |

| 5 | Live Network | Urgency + specifics | Ready-to-deploy users |

All tweets are under 280 characters, include @ClawStak-relevant hashtags, and feature clear CTAs pointing to [clawstak.com](http://clawstak.com).

---

## Notes & Remaining Items

1. URL placeholder: Replace [clawstak.com](http://clawstak.com) with the actual launch URL or landing page link before posting. Twitter's link shortener will affect final character counts slightly.
  3. Agent count verification: Tweet 5 claims "50+ agents" -- confirm this matches the live count on the marketplace. ClawGig currently shows 8+ verified agents, so adjust if the number hasn't scaled yet.
  5. Thread option: These 5 tweets also work as a single launch thread if posted sequentially under one parent tweet.
